

## **SMARTGUARD**

Model: SmartGuard-63A-S0

Simple Whole home backup, no need of additional switchboard

Seamless ≤ 20 ms ultra-fast switchover to power backup mode

**Reliable**Provide bypass mode when a fault occurs

Intelligent <sup>1</sup>
Intelligent load control with built-in EMMA

## SmartGuard-63A-S0 **Technical Specifications**

| Technical Specification              | SmartGuard-63A-S0                                                |
|--------------------------------------|------------------------------------------------------------------|
|                                      | General Data                                                     |
| Dimensions (W x H x D)               | 485 mm × 150 mm × 355 mm                                         |
| Weight                               | ≤14 kg                                                           |
|                                      | Performance                                                      |
| AC Voltage (nominal)                 | 220/230/240 V L/N+PE                                             |
| Max. current (from Grid)             | 63 A                                                             |
| Max. current (from Inverter)         | 60 A                                                             |
| Max. current (to backed-up load)     | 63 A                                                             |
| Max. current                         | 05 A                                                             |
| (to non-backed-up load) <sup>2</sup> | 63 A                                                             |
| Self consumption                     | 10 W                                                             |
| Low-voltage ride-through             | Supported                                                        |
| Switchover time                      | ≤ 20 ms (in Seamless Mode)                                       |
|                                      |                                                                  |
| Bypass operation mode                | Manual                                                           |
|                                      | Interface                                                        |
| Power output                         | 9.5–13.2V @ 100mA, ≤ 3m                                          |
| LAN                                  | 10/100 Mbps, ≤ 100 m                                             |
| WAN                                  | 10/100 Mbps, ≤ 100m                                              |
| WLAN                                 | AP Mode, 802.11b/g/n (2.412 GHz-2.484 GHz)                       |
| RS485                                | 9600/19200/115200 bps,× 2, ≤ 50m                                 |
| Digital input                        | ×2, ≤ 20 m                                                       |
| Digital output                       | ×2, ≤ 20 m                                                       |
|                                      | Measurement Range                                                |
| Current range                        | ≤ 63 A                                                           |
| Voltage range                        | 1P (L-N): 85–299 V AC                                            |
| Energy accuracy                      | ± 1%                                                             |
|                                      | Device Management                                                |
| Smart energy controllers             | up to 1                                                          |
| Smart chargers                       | up to 2                                                          |
| Heat pump                            | up to 1 <sup>3</sup>                                             |
| Shelly device                        | up to 20                                                         |
|                                      | Environment                                                      |
| Noise emission                       | ≤ 29 dBA                                                         |
| Cooling                              | Natural Convection                                               |
| Relative humidity range              | 5%-95% RH (non condensing)                                       |
| Max. operating altitude              | 4000m (derated over 2000m)                                       |
| IP rating                            | IP55                                                             |
| Operating temperature range          | -25°C-50°C <sup>4</sup>                                          |
| operating temperature range          | Compatible Device                                                |
| Smart energy controller              | SUN2000-2/3/3.68/4/4.6/5/6KTL-L1 / SUN2000-8/10K-LC0             |
| Smart charger                        | SCharger-7KS-S0                                                  |
|                                      | -                                                                |
| Heat pump                            | SG-ready                                                         |
| Shelly device                        | Shelly Plus Plug S, Shelly Plus 2PM, Shelly Pro 2PM <sup>5</sup> |

<sup>\*1</sup> The intelligent energy scheduling feature is available for a 2-year free trial. After the trial, it will be available at no more than €99 per site per year.

Disclaimer: The preceding values are measured by an internal laboratory of Huawei in a specific environment. The actual values may vary with products, software versions, usage conditions, and environmental factors.

<sup>\*2</sup> The sum of the output current of the backup port and the non-backup port could not be more than 63A
\*3 1 SG-ready Heat Pump can be connected directly. Others can be connected via shelly devices
\*4 On-grid Mode: 25-30 °C, no derating; 30-40 °C, linear derating from 63A to 50A; 40-50 °C, linear derating from 50A to 40A
Off-grid Mode: 25-40 °C, no derating; 40-50 °C, linear derating from 54.5A to 50A

<sup>\*5</sup> The supported firmware version of shelly devices can be found in user manual
